Secondary School

Education (90.26 PR)

Mar 2013 - Jul 2012

Bhagvati Vidhyalaya, Bhesan

CERTIFICATIONS

Web Development Trainee

Agile Infoways, Ahmedabad

PROJECTS

FFTranscription

Technologies - *ReactJS* | *Wordpress CMS* | *GraphQL*

Developed FFTranscription Website with ReactJS to solve the problem of SEO as a single page application using WP Engine server-side rendering capabilities and incremental site generation, fetched data for blogs from WordPress CMS with the help of GraphQL to query only the necessary data and to update changes only when needed using incremental site generation for blogs. Achieved code splitting using lazy-loaded components. The website is designed using SASS and bootstrap.

Website is hosted on AWS EC2 instance running custom node server, fetching images from CloudFront CDN connected with WordPress and storing images on AWS S3 Bucket.

IT Support Guys

Technologies - *React.js* | *Wordpress* | *Node.js*

IT Support Guys Web Application is developed with ReactJS to display real-time IT Support data using WebSocket, it uses socket.io to display real-time data to the front-end, apart from that it displays various analytical charts using different calculations.

My role in this project was to build and design the UI components, I have developed different components as per project requirement to be used across the app, integrated relevant API(s) using redux to display chart and analytical data, used SASS and bootstrap for the styling of IT Support Guys web application

Dependable Solution

Technologies - *Wordpress*

Dependable Solution is a community Software Management that used Wordpress as it's the frontend to display the licensing to the software.

My role was to build the front-end using ReactJS to use its SSR capabilities and speed to display results fast and efficiently.

NMAutopress

Technologies - *React.js* | *Wordpress*

NMAutopress is a community to search sell used car that used ReactJS as it's the frontend to display result.

My role was to build the front-end using ReactJS to use its SSR capabilities and speed to display results fast and efficiently.
