PROFILE

Experienced and detail-oriented MERN Stack Developer with 3 years of proven expertise in building scalable web applications, RESTful APIs, and responsive UI/UX. Proficient in JavaScript, React, Node.js, and MongoDB with a strong grasp of deployment, testing, and agile methodologies. Committed to delivering robust, high-performance software in corporate environments.

SKILLS

React.js Wordpress
Node.js Figma
Next.js
Vue.js
PostgreSQL
MongoDB

WORK EXPERIENCE

MERN STACK DEVELOPER

Codeffi

Sep 2024 - Present

- Architected RESTful APIs and integrated third-party services (Stripe, Firebase, AWS S3).
- Implemented JWT authentication and role-based access control.
- Led 2 junior developers and participated in code reviews and sprint planning.

MERN STACK DEVELOPER

Skyline Infosys

Sep 2022 - Aug 2024

- Designed UI components using React and Material UI for e-commerce and CRM platforms.
- Transitioned to full-stack role; built Express APIs and MongoDB schemas.
- Integrated third-party APIs and managed CI/CD pipelines.

WORDPRESS DEVELOPER

E2M Solutions

- Learned and worked as a Wordpress and ReactJS Developer
- Works closely with the design and backend team.

EDUCATION HISTORY

Bachelors in

Computer Science(7.19 CGPA)

Jul 2016 - Apr 2019

Sardar Patel University, Vallabh Vidyanagar

Higher Secondary School

Education - (85.66 PR)

Jul 2015 - Mar 2016

Dreamland Education Institute, Bhesan

CERTIFICATIONS

Web Development Trainee

Agile Infoways, Ahmedabad

PROJECTS

Rooster

Technologies - *React.js* | *Node.js* | *PostgreSQL*

Rooster Web Application is developed with ReactJS to display shift management system, it uses employee time manage and create schedule system to the front-end, apart from that it displays Rooster.

My role in this project was to build and design the UI components, I have developed different components as per project requirement to be used across the app, integrated relevant API(s) using redux to display chart and analytical data, used SASS and bootstrap for the styling of Rooster web application

Forest360

Technologies - *React.js* | *Node.js* | *PostgreSQL*

Leading forestry management and forest management in NZ. Over 30 years of expertise in managing New Zealand forests.

Website is hosted on AWS EC2 instance running custom node server, fetching images from CloudFront CDN connected with WordPress and storing images on AWS S3 Bucket.

Blankstate.AI

Technologies - *React.js* | *Nest.js* | *PostgreSQL*

Unconscious and Conscious Bias, misinformed opinions and lack of emotional intelligence in organisations undermine their credibility and limit their growth and innovation.

Cognitive information exists everywhere in an organisation and everyday lives, but no one is trying to make sense of it at scale with ethics.

The essence of this data is fragmented in un-semi-structured formats across teams and applications.

As Generative AI becomes more powerful, knowledge and experience scatter without anchors and control on our rights.

My role in this project was to build and design the UI components, I have developed different components as per project requirement to be used across the app, integrated relevant API(s) using redux to display chart and analytical data, used SASS and Tailwind Css for the styling of blankstate web application
