### PROJECTS

#### Rooster

- Rooster Web Application is developed with ReactJS to display shift management system, it uses employee time manage and create schedule system to the front-end, apart from that it displays Rooster.

#### Blankstate AI

- My role in this project was to build and design the UI components, I have developed different components as per project requirement to be used across the app, integrated relevant API(s) using redux to display chart and analytical data, used SASS and Tailwind Css for the styling of blankstate web application
